ABOUT ME

I consider myself a person who follows modern web development practices and new technologies; a person who never stops learning; a person who is trustworthy, responsible, respects deadlines, passionate front-end developer who cares about user experience, application performance, and code maintainability. I always collaborates with Product Owner, QA engineers, designers and Back-end developers to make the best product for the users.

WORK EXPERIENCE

Jumia Group FRONT-END UI/UX DEVELOPER 2018-now

- Research/Brainstorm new features with the team through an agile process.
- Wireframing/Prototyping a project based on the requirements.
- Collaborating with design team for the final output with brand UI.
- Wrote unit tests which help us to figure out bug prior deploying.
- Transforming finalized prototype to semantic front-end code.
- Working with QA engineers to analyze/perform test cases.
- Being proactive for new features/requirements and doing prior research/analysis.
- Learnt and contributed to backend using PHP and Golang.

GrowByData FRONT-END UI/UX DEVELOPER, 2015-2016

- Wireframing/Prototyping
- Front End Management (Using Less, Sass, Bower, Grunt , Gulp, Yeoman etc...) for different platforms such as Php/.Net
- Front End Framework (Angularjs, React js etc...)
- Visual Design to maximize User Experiences
- JIRA for project managment

i-TECH NEPAL WEB DEVELOPER, 2012-2015

- Graphic works (print, media, logo etc...)
